INSTALLING YOUR WI-FI EXTENDER

Place the Extender in the area of your home where you currently have a poor Wi-Fi signal. The Extender needs to stand straight up on a solid surface. Total setup time will be up to 10 minutes.

Internet LED

Wi-Fi LED

1 Plug-in the power to the Extender. Wait for the Extender's Wi-Fi LED to be green and the Internet LED to be red.

2 Press the WPS button on the Router.

3 Within 15 seconds, press the WPS button on the Extender.

Wi-Fi LED

4 The Wi-Fi LED light will flash yellow briefly on both the Router and Extender.

Wi-Fi LED

5 The Extender's Wi-Fi LED will flash between green and red while the device is in pairing mode with the Router. This could take several minutes.

Internet LED

Wi-Fi LED

6 When the Extender's Internet and Wi-Fi LED lights are both solid green, the Extender is successfully connected to the Router.

If the Extender's Internet and Wi-Fi LED lights do not become solid green, move your Extender to a different location, closer to the Router. Start over at Step 1.
